A GOOD EXAMPLE OF EDUCATION.

The careful use of resources stands for our conviction that quality and sustainability belong together. As educational institution, we have a special responsibility in this respect: Our products will shape future generations.

This is precisely why we are committed to carefully treating nature and the environment by

- avoiding tropical woods
- not using substances containing solvents
- remaining significantly below the legal emission limits
- producing low-dust and low-sound
- reducing packaging
- efficiently disposing of waste

We would be delighted if this commitment is to be rewarded: Our products are repeatedly awarded numerous seals of approval and certificates. This motivates us every day anew to put safety and quality into practice. And to work on many new developments that we make transparent - through regular checks by independent experts and in our own laboratory. Because quality is the benchmark for us, today and tomorrow.

OUR MOST IMPORTANT TOOL: THE EAR.

When we at A2S develop a new product, the first thing we do is work with our ears. Our experience tells us: Our customers know exactly what requirements the ideal chair or table must meet. That is why we take the time to listen to them in peace. The result is furniture such as Flex, which enables flexible learning and can cope with the tough everyday school life. Flex is full of intelligent ideas: Its waisted backrest allows people to sit upside down from time

to time, so that the "owners" can stay healthy in motion. Also its floor protectors are not only gentle on the floor, but also on the nerves. Flex is just one of many examples to show: For designing and realisation of our chairs and tables we love to learn from our customers. Our field service advises you already during planning and conception of your rooms and can thus take all wishes and requirements into

account. In order to give you an idea of how living and working with our ideas will change, we present photorealistic drafts of your plans in advance. This is how rooms are created according to your ideas - with A2S as your competent partner.

WE'RE HERE FOR YOU.

Our customer service department takes care of everything else, so that you can concentrate fully on your educational work. And that even before you buy anything from us:

Our sales representatives will be happy to inform and advise you on site and discuss all your wishes with you. The A2S planners set everything up according to your ideas and,

if desired, visualise the planned room photorealistically in advance. We deliver your furniture mostly pre-assembled, some larger pieces we assemble on site.

In the unlikely event that something does not meet your expectations or a spare part is required, we will resolve the issue, quickly and reliably - and that's a promise!

ELEMENTARY SCHOOL

The time spent learning in the elementary school years builds the foundation for a student's entire school career. It is the basis for a happy, responsible, and successful future. All children should be provided with an outstanding education, one that is tailored to their capabilities, in order to ensure a successful transition to secondary schools. Various teaching concepts can be supported with sophisticated, positively-designed learning environments.

Clearly-arranged and flexible furnishing concepts make varied daily routines easier. In addition to the traditional teaching phases, space is created for movement, as well as group and individual work. This promotes the cognitive, social, emotional, and physical aspects in children.

Single-function use | Instruction/Resting area | Fixed furniture | Height-adjustable

PRODUCTS

STUDENTS

- 7130 School chair
- 7750 School table

TEACHERS

- 8382 WOODPLAC®

- 7523.901 Teacher's desk C-shape

MORNING CIRCLE / RESTING AREA

- 4425.150 Segmental arched shelf
- 5030.035 CHILL bean bag Junior
- 5034.001 Seat cushion

PC WORKPLACE

- 1810.168 Computer table
- 8382 WOODPLAC®
pneumatic spring swivel chair
- 7894 Pneumatic lift stool

The height-adjustable individual tables can be easily adapted to fit each student, enabling pleasant, ergonomically correct learning.

Mono-functional use | Instruction/Seating circle | Fixed furniture | Fixed size

GROUP WORK
A SET SPOT IN THE GROUP.

For children, school enrollment means entering a completely new environment. Small groups and set spots provide advantages, so children can focus on learning from day one.

Using the example to the left, height-adjustable tables ensure that students of different sizes can work together in an ergonomically pleasant way. An area separated by mobile, segmented arched shelves with seat cushions, can be used for a seating circle, or as a break-time retreat.

Using the example to the right, the compact arrangement of the traditional solid wood desks offers ample room for an additional seating area with benches.

PRODUCTS

STUDENTS

Our 70-series: The traditional combination of solid wood chair and desk creates a warm, natural learning atmosphere.

Multi-functional use | Instruction/seating circle | Flexible furniture | Learning at eye-level

DIFFERENTIATED LEARNING ALWAYS RETHINK THINGS.

Frontal instruction, working in silence or in groups, seating circle - depending on the phase of instruction, the division of the learning room can be rearranged several times a day. In order to meet the needs of students and teachers, the seating arrangement must be able to be changed quickly and easily. With little effort, the flexible individual desks with casters can be moved, and the chairs with footrests bring all students to eye level at a single movement..

DIFFERENTIATED SPACE
SCHOOL FOR ALL CHILDREN.

The associated differentiated space for customizing learning meets the demand by offering a stimulating place of learning for all children. It can be used to provide individual support, as an area of retreat, to concentrate on the lessons and materials, or for undisturbed conversations - for example with parents.

Our product range of bean bags and floor cushions provides the necessary balance of comfort - because it is well-known that relaxed students learn the best.

Frontal instruction

U-shape

MUSIC ROOM A ROOM COMPOSITION FOR EVERY KEY.

Whether it's theoretical music lessons, or simply performing music ... even singing - the flexible furniture makes it easy to quickly change from the frontal setup, to the two-row seating arrangement in a U-shape with benches on the inside.

A special cabinet for instruments on the back side of the room provides custom, secure storage space for valuables.

LEARNING ROOMS

Learning is an individual process which works best when students have the ability to coauthor their own learning progress independently. Individual learning formats are becoming more popular. And they create ever-changing challenges for pedagogues and learning rooms alike: pedagogues are supposed to make it possible for every student to work in peace in their own way without losing sight of the overall picture; learning rooms should generally have both multi-functional equipment and specialized areas.

When designing learning rooms, A2S focuses especially on zoning and acoustics. This is to ensure that classical lecture format, group work, partner work, but also silent work, retreat, and relaxation are possible in one and the same environment.

Group work

MULTI-FUNCTION ROOM

YOU DON'T NEED A LOT OF SPACE, JUST GOOD IDEAS.

This room concept allows for all social forms: classic lecture format, group or partner work, and silent work. You can also create secluded retreat and relaxation areas. The flexible furniture has versatile uses for self-directed and competence-oriented learning. Acoustic barriers create a disturbance-free work atmosphere, especially for intensive individual work. The height allows you to keep an eye on everything even when you are behind the barriers.

The student caddies, individual or as partner caddies, give each student the possibility of storing his/her personal learning materials in the classroom. If needed, the individual student and teacher caddies can easily be combined into a practical, expandable material cart.

In order to underline the idea of mobility and ensure flexibility for all constellations, all walls were given robust, flexible wall board systems. The surfaces are either whiteboard or chalkboard.

Individual work

Partner work

Classic lecture format

The textile-covered, movable acoustic barriers permit the free, discrete zoning of the room. Their height allows you to keep an eye on everything at all times. The personal caddies for students and teachers follow you to every work station and can be linked into entire shelf units if needed.

Classic lecture

Partner work

Small group work

MULTIFUNCTION ROOM WITH TRIANGULAR TABLES
**FLEXIBLE FURNITURE ALSO
 CREATES AN ACTIVE MIND.**

Whether classic lecture format, group or partner work - the triangular tables adapt to every instruction style because they can be rearranged quickly and easily into every possible constellation for 2 to 8 students..

In addition to the flexible triangular tables, protected IT work stations provide peace and quiet for focused internet research. The combination of caddies and acoustic barriers gives teachers the freedom to divide the room into zones for differentiated work without restricting their ability to keep an overview. A retreat and relaxation area offers space for small breaks.

Group work

The triangular tables, easy to move and combine, are combined with chairs with light Pagholz® seats and C-shaped frame. The double-sided caddies can be accessed by two students at the same time.

Group work

MULTI-FUNCTION ROOM WITH WAVE-SHAPED TABLES
SMALL CHANGES MAKE ALL THE DIFFERENCE.

This installation variant of the previous learning room shows that merely changing details like adding organic wave edges to the tables or altering the colours of the acoustic barriers and lounge furniture can result in a completely different room atmosphere.

In addition to the flexible work places at the freely combinable wave-shaped tables, there are also fixed IT work stations. Using material caddies and acoustic barriers, it is easy to quickly divide the room into zones for differentiated work.

Classic lecture

Silent/partner work

The eight-adjustable, single column table with a visual barrier ensures the greatest possible mobility for pedagogues. The ergonomically shaped Flex-Z provides students with maximum mobility.

COLOUR SCHEME

AGE GROUPS, ORDERED BY COLOUR.

In this model of multi-age-group learning, different learning groups are instructed by two pedagogues in one room based on proficiency levels. The colour coding based on proficiency level helps both students and teachers to orient themselves.

Flexible shelves and acoustic barriers allow for the quick and quiet creation of different zones in the room, depending on group size and instruction method. The mobile teacher work places can be pushed into the right position at any time. The pre-installed separation wall system provides the additional possibility of splitting the room into two separate classrooms if needed.

Group instruction

Flexible quarter circle shelves help structure the room. The footrest stool with simple and tool-free single-handed operation is suited for students of various body sizes.

Classic lecture format with separation

Group work

Partner work with separation

Circle seating

Partner work

The adjustable foot rest of the stool allows students of different sizes to sit at eye level.

MULTI-AGE-GROUP LEARNING

ONE ROOM CONCEPT FOR ALL AGE GROUPS.

Current brain and development research confirms that the intellectual, psychological, and physical development of children do not run parallel. Even at age 7 there can be clear differences. Elementary schools thus not only combine children with different social origins, nationalities, and religions but also with very unequal developmental speeds and other learning-related preconditions, children with and without disabilities. An elementary school that claims to be a "school for everyone" must therefore develop learning and organization forms that consider this diversity an opportunity. Multi-age-group learning (IYL) provides a good possibility to do just that.

Using the mobile furniture, the learning room shown here can be easily adjusted for all needs and work forms. Chairs with easily adjustable foot rests allow students of different sizes to sit comfortably, ergonomically, and securely at a uniform height, which helps them keep a better overview of the room. The triangular tables can be configured in numerous arrangements and group constellations. The adjoining specialized room can be used for the more focused study of learning materials or for undisturbed meetings, for example with parents.

specialized room

Group instruction with specialized areas

Self-learning centre

Team room

THE CLUSTER MODEL

EVERYTHING AND EVERYONE UNDER ONE ROOF.

This building section houses several age groups in classrooms and group or specialized areas. The heart of such a cluster is an area that serves both as a learning and lounge zone in the centre of each floor. Team rooms, sanitary and storage possibilities are well integrated.

The flexible furnishings and the universally usable rail panel system provide every individual classroom with the possibility of flexible instruction in the various social forms. The additional large specialized area permits students of several classes to work individually at the same time.

A team room on every floor serves as a retreat for the pedagogues in order to work with focus or to recharge.

The modular media work stations are equipped with outlets and network plugs. The acoustic back walls can also be used as bulletin boards.

Lounge area

The cabinet system offers many different modules and surfaces for the individual design of hallway areas.

Wardrobe

LEARNING WITH FRIENDS.

Learning does not work without friends. A prerequisite to this is a philanthropic attitude that encourages friends to learn together.

HOW DOES LEARNING WORK?

The brain is not a muscle. We can practice and train it as much as we want because we learn by building relationships - with objects and people. Every time we discover something which is important for us, it "gets under our skin" and so-called emotional centers are activated in our brains. They lie in the center of the brain and are connected to all other areas.

WHAT EFFECTS DO FEELINGS HAVE ON LEARNING?

If the emotional centers are stimulated, chaos ensues in the areas that are responsible for regulating the body. This then expresses itself in feelings: The heart begins to race, we break into a sweat, it becomes hard to catch our breath, or we become weak in the knees. These are the somatic markers that occur when something "gets under our skin". And when we find a solution, this chaos becomes order again. This releases neuroplastic neurotransmitters which act like "fertilizer" and stabilize all the networks in the brain that contribute to the solution of the problem. For this reason, we can only learn something permanently when it is emotionally charged, i.e. is fun. Only when the emotional centers are stimulated - for instance when we manage to do something well or we have a "lightbulb moment" - are all the neurotransmitters released that result in plastic remodeling processes in the brain.

SO WHAT SHOULD BE DONE?

We should develop a culture of interaction with each other in which we do not put each other down or treat each other like objects but meet each other as subjects. We can do this by inviting, encouraging, and inspiring others to want to create another even better experience. There are people who not only manage to encourage other people but even inspire them because they enjoy igniting a spark in others. They reawaken the desire in others to open up again, to start something new, to open their eyes. And the wonderful thing about it is that somehow this always seems to work.

„ALL PEOPLE START THEIR LIVES AS DISCOVERERS AND DESIGNERS. THEY SHOULD NOT END UP AS OBJECTS IN THE EDUCATION AND TEACHING METHODS OF OTHERS.“

(Dr. rer. nat. Dr. med. habil. Gerald Hüther, Neurobiologist, Chairman of the Academy for Potential Development)

SELF-LEARNING CENTRE

In addition to specialized and multi-function rooms, self-learning centers provide the ideal supplement for self-directed deeper study of the material. Here, students can retreat into a relaxed, homey atmosphere or work together in teams. Different zones for research, communication, or work are characteristic. Libraries and media centers are generally part of a self-learning centre for secondary levels I and II. Communication and rest areas should be acoustically separated from each other, without the room losing its clear structure. In this way, one or two teachers are enough to monitor the class room. Due to the size of most self-learning centers, they can even be used for smaller events.

ROOM IN THE ROOM

**RIGHT IN THE MIDDLE OF IT
AND YET UNDISTURBED.**

The extraordinary thing about this room is the large rotunda-like structure, the outside of which acts as a library and offers both shelf space and individual work places. Its interior is acoustically shielded and offers the students a protected retreat for reading and relaxing. Due to its size, the inside area can also be used for presentations and discussions of entire learning groups.

Grouped around it are places for various work forms from individual and group work to internet research. The individual work places have lower acoustic separators which facilitate focused work free of interruptions.

Communication islands with flexible sitting elements and mobile book carts invite interactions in small or large groups. Despite the various possibilities, it is easy to have a full overview of the entire room due to its clear organization and zoning.

ATRIUM

A GOOD LEARNING CLIMATE BEGINS WITH THE RIGHT ENVIRONMENT.

There are various theories of how people can acquire and absorb new knowledge successfully. All of them have one thing in common: people like to learn and meet where they feel at home.

This self-learning centre in the atrium is used as a zone for meeting, communicating, learning, and relaxing.

Between the library and the various areas for large and small groups, there is a central rest area with comfortable sofa islands.

The high, sound-absorbing backrests invite students not only to relax but also to interact with each other. They do not disrupt the surroundings and are neither disrupting in and of themselves.

Panel end desks provide space for spontaneous meetings of large or small groups. Media work places with integrated electric and network outlets permit uncomplicated fast internet research.

The elements of the flexible wall board system can be shifted, turned, or taken out and be used in a flat orientation for joint work.

LEARNING LANDSCAPE A LEARNING UNIVERSE WITH A CALM CENTRE.

All around the rotunda-like acoustically shielded rest area, the library shelves are arranged in a star-shape. You can also find social areas around it: IT work stations, communication zones, retreat areas, and group work places.

An interesting thing about this variant are the three separate in-depth study rooms which can be used for group and specialized work as well as for meetings of the pedagogues or with parents.

REMODELING

ONLY ONE STEP TO THE SELF-LEARNING CENTRE.

This former specialized classroom was converted into a self-learning centre. The room, which is always used under supervision, contains a library and media centre, as well as several possibilities for group work and interaction. The second, adjoining room can be used for presentations and separate group discussions.

ROOM SIZE:
self-learning centre 13.0 m x 8.0 m
specialized room 8.0 m x 8.0 m

The nook cube with Tidy-boxes is open on all sides and can be used as a mobile island for teaching materials.

INTEGRATION OF TRAFFIC AREAS

THE LEARNING CONCEPT MOVES INTO THE HALLWAYS.

This group room is special in that it integrates the hallway areas. With this form of expansion of the learning areas, the challenge is not only to integrate the hallway in an optically and functionally meaningful manner, but also to meet the specific regulations for hallway areas (for example evacuation paths, fire safety regulations). The room should be used as flexibly as possible by students in different classes. It serves the students as a central lounge area for interacting in and as a protected retreat area for relaxing in as well as being a good place for internet research, group work, or as a meeting point for the morning circle.

Zoning for conference

Zoning for morning circle

Hallway area with zoning for groups- and partner work

Stackable tables and chairs make room for many ideas. The casters on the table feet make it easier and faster to remodel the areas for any occasion.

CAFETERIA

The cafeteria or dining hall has an important social function beyond merely providing a venue for eating together. Especially in all-day school, it is a place to meet, relax, and recharge. In order to create a sense of comfort in rooms as big as this, acoustics play an important role in the design. Frequently, the cafeteria area is also combined with the lobby and event area and used for extracurricular activities.

The cafeteria is correspondingly zoned in the different organizational models and supply systems. Depending on how the food or cooking are integrated into the pedagogic concept of the school, open cooking stations for students can also be integrated.

CAFETERIA A MEETING POINT FOR EVERY TIME OF THE DAY.

This cafeteria of a school with all-day care is directly connected to a canteen. Two snack counters - with and without staff - ensure short distances and help prevent lines, even during peak times. The inviting atmosphere of the cafeteria is created by the harmonic colour palette and the natural materials, such as domestic wood from sustainable forestry. The integrated lounge elements are equipped with hygienic, washable materials which are extremely resistant. The generous zoning of the room allows for flexible changes and offers plenty of retreat possibilities. The cafeteria is a popular meeting point not just during the day but also during evening events.

The texture of Pagholz® chair seats is both appealing and extremely resistant. The school logo is located on the back side of the backrests.

CAFETERIA & ASSEMBLY HALL DAILY NUTRITION AND EVENING PROGRAMME ALL IN ONE.

The large cafeteria can be divided in two by a built-in retractable wall to produce space for an assembly hall with a variable podium and stackable auditorium seating.

During its secondary use, the cafeteria can continue to operate independently and uninterrupted in the separate area.

The self-service area next to the service window also provides the possibility of enjoying snacks and beverages even when the cafeteria is closed.

The mobile podium and step elements work together to provide a sturdy and safe stage.

TEACHER'S WORK AREAS

The everyday life of pedagogues has changed greatly with the introduction of new learning concepts and especially all day care. Many teachers used to do much of their work at home in peace and quiet; now it is done at the work place onsite. The teacher's lounge thus has to adapt and create zones for many different needs: whether fixed or flexible work places, meeting islands or separate meeting rooms - from uninterrupted work to conferences, everything must be possible. A tea kitchen or the comfortable lounge elements form retreat areas in which to unwind and interact with colleagues in a relaxed setting. Important points for the planning are, for example, centralized or decentralized learning location, teacher's distance from students, personalized or non-personalized work places.

TEACHER'S LOUNGE REDEFINING THE TEACHER'S LOUNGE.

The teacher's lounge meets all essential requirements for a modern teacher's lounge in a cleverly zoned room. In the entry area, directly by the teaching plans, the communicative kitchen corner provides a possibility for everyday interaction. Lounge sofas, which offer a spacious and quiet retreat area, invite the teachers to relax and hang out.

In the centre of the room is an open hexagon which houses the teacher lockers and wardrobe on its outside. On the inside, there is a sound-proof retreat zone for undisturbed work or brief meetings. The individual work places are located in the honeycomb-shaped, modular COMBi system. Its sound-absorbing separating walls offer the possibility to use the room very individually and give each teacher the optimal privacy. The personal teacher caddies support a flexible pool formation for these work places.

The mobile caddies can be locked and let teachers store personal items onsite.

TEACHER'S LOUNGE WITH MEETING ROOM

PROFESSIONAL AND PERSONAL - LINKED AND SEPARATE.

This concept gives pedagogues everything they need, both for communicative interaction and for work. Sound-absorbing walls not only divide the room into several small groups but also absorb the noises in the room.

The generous lounge and kitchen area close to the entrance catches newcomers and splits the room into communication and work areas.

An additional, separate meeting room provides the fitting framework for small meetings, presentations, and conferences in a protected space.

LARGE TEACHER'S LOUNGE ITS TRUE GREATNESS LIES IN ITS LAYOUT.

A clear structure and zoning is necessary merely due to the enormous size of this room. It houses the work places for 42 pedagogues. Acoustic barriers and half-height cabinets separate work space from traffic zones and communication areas.

A comfortable communal area for interaction, protected individual work places for concentrated work, and flexible retreat areas in which to study individual topics in depth ensure that everyone can find the right place for his/her current needs.

The shape of the comfortable upholstered furniture fits with the honeycomb structure of the separating walls. In combination they produce protected retreat areas.

TEAM ROOM
**ALL TOGETHER AND
EACH TO HIS OWN.**

The generous, open design of this team room for 10 pedagogues and 4 special pedagogues provides all possibilities for focused work, isolating the teachers from their colleagues.

The individual work places are protected by half-height acoustic separating walls, the walls of the meeting room are made of glass and the lounge area is separated by a semi-transparent space separator.

All work places are equipped with electric outlets. For this reason, separate IT work stations were foregone. Pharmacy cabinets with vertical drawers offer plenty of storage space.

The vertical pharmacy cabinets at the work places offer clear organization and save on unnecessary digging in drawers.

TRIPLE TEACHER'S LOUNGE
**NOT JUST A
TEACHER'S LOUNGE -
A TEACHER'S SUITE.**

The fact that everything a faculty needs can be cleverly fit into a single room, does not mean that this is the only way. This interior design concept includes 3 rooms connected to each other for the different teacher areas.

The snack area, which looks like a café, invites you to withdraw completely from the work area during breaks. The generous lounge area also permits moments of relaxation without having to think of the schedule. A separate, protected room permits undisturbed, smaller meetings, for example parent-teacher conferences.

The work area is zoned and equipped to permit focused work everywhere despite the high density of the work places.

ALL-DAY SCHOOL

In full-day schools, learning is the focus - but it is not limited to the instruction alone. After the school program in the morning, there is also a care in the afternoon. A hot lunch, supervision while learning and homework, as well as active free time, are all part of this model.

In the different action rooms, motor and cognitive skills are strengthened, and the development of creativity and social skills is promoted.

In its diversity, the all-day school concept in particular demands individual furnishing concepts.

ALL-DAY CARE FOR LONG DAYS WITHOUT BEING BORED.

In addition to traditional instruction, exercise and resting phases, eating and learning time as well as play and free time are integrated into the school day of all-day care. Since all of these phases occur in the same room, this requires flexible furniture that can quickly and easily redesign the learning room at any time.

The partition elements, which can be moved by the staff, divide a large room into two classrooms in the morning, arranged for group work, and a seating circle. After the room opens up in the afternoon, the mobile and stackable tables and benches can be used to transform the room for free time.

Whether for playing, painting, researching on the PC, or simply resting on the upholstered furniture - the right environment can be created for every need. An integrated kitchenette makes it possible to serve fresh, healthy food and drinks in the afternoon.

Afternoon care

ALL-DAY CARE THREE CORNERS FOR MORE MOBILITY.

With our stackable triangular tables, this learning room can be converted from the morning circle, to group work, to the relaxed afternoon situation, in no time. Cabinet walls with additional add-on cabinets utilize the entire room height, offering plenty of storage space. A mobile beverage cart also ensures that the afternoon snack is always within reach.

The height-adjustable mono-column table with mobile caddy gives educators a good overview with maximum freedom of movement. The elements of the sliding panel system can easily be removed and used horizontally for work on the table.

THE FOOTREST CHAIR BRINGS EVERYONE TO ONE TABLE.

The footrest chair is ideal for afternoon care, which often lasts for several years for students. Its height-adjustable footrest allows larger students to sit at the same height by using a tool-free, simple one-hand operation – for learning at eye level.

- Sitting together at a uniform table size with a working height of 76 cm
- The footrest height can be adjusted easily and without tools with just one hand
- No tilting or removing the footrest
- The footrest is resistant to dirt and moisture from shoes
- Stable base and safe to get on the chair
- Up to 3 chairs can be stacked to tidy up

The fabric-covered, mobile acoustic partition walls at 4' 7.9" tall allow for quiet working without impairing the overview of the room.

HOMEWORK ROOM

DO YOUR HOMEWORK LIKE YOU'RE AT HOME.

By zoning rooms into different areas, COMBi acoustic partition walls offer workplaces with quiet atmospheres, so students can do their work in undisturbed peace. Teachers can easily move from one place to another using the lightweight pneumatic lift stool, while helping each student individually. A separate relaxation area with bean bags create a welcome retreat, all within sight of the educators and staff.

PLAY AND BUILD ROOM CREATIVITY AND ORDER CAN GO TOGETHER.

A playful and creative balance in class is important, especially during long school days. One also needs order in the spaces where students play and work creatively. So it's perfect when the furnishings can help to make tidying up easier, allowing more time for more fun.

The Tidy Box cabinets offer plenty of storage space for small items, like building blocks and supplies. What's more, Tidy Boxes can zone rooms into areas for play, alone or in groups. The sideboards on the walls can be used for storage, or even as exhibition areas.

The ergonomic plastic chair FLEX with Z-frame offers maximum movement, and prevents fatigue when sitting for long periods of time.

Tidy Boxes bring order to everyday school life - not just for toys. They are suitable as personal cubicles for students to learn organization and responsibility.

HALL FURNITURE SYSTEM THERE IS PLENTY OF SPACE IN THE HALLWAY - FOR IDEAS TOO.

The modular hall furniture system can be individually adjusted and combined to meet the structural conditions. It combines plenty of storage space, with a large variety of freely-configurable basic elements and colors.

The integrated seating niches create small meeting places for cozy breaks without having to adjust escape routes. The cabinet system also ensures safety in the hallways, because it meets the fire protection regulations and is certified as per DIN 4201 B1.

Seating groups made of SOLID tables and benches offer additional places to hang out and work in the hallway area outside of the classroom.

HALLWAY CABINET SYSTEM

FACTS

- flexible for various rooms and budgets
- base material as per B1 and therefore flame-retardant
- in 2 different widths for 1 or 2 students
- Tidy Boxes, which also fit under A2S tables
- pull-out stool that provides non-slip stability
- stable clothes rail for jackets
- cabinet-high handle strip, keeps the escape route clear and can be easily reached from any height
- expandable add-on cabinet with plenty of storage space
- height-adjustable base to protect against moisture
- all cabinets can be locked if desired

You can find additional information about this in our hallway furniture folder and in our product catalog.

The adjoining wardrobe ensures more order in the learning room. See furnishing example page 22.

The fixed schoolbag rack is combined with a wall-mounted coat rack. See furnishing example on page 34.

The mobile schoolbag racks can not only be used in the hallway, but also in the classroom, e.g. as a room divider. See furnishing example on page 24.

INTEGRATED WARDROBE JACKETS, BAGS AND SHOES DON'T HAVE TO STAY OUTSIDE.

These examples show classrooms with an integrated wardrobe. Clothing hooks and Tidy Boxes provide necessary order for schoolbags, jackets and shoes. To supplement the wardrobe shelves, we recommend benches for taking shoes off and putting them back on, which can also be used for the morning seating circle. All of the products shown are also suitable for use in the hallway area, depending on the specifications.

EATING TOGETHER STRENGTHENS THE SENSE OF TOGETHERNESS.

When children eat together, they boisterously tell stories and laugh. All the while, they are learning table manners and how to treat each other with respect.

In this furnishing example, round tables with FLEX-Z plastic chairs create a relaxed seating arrangement. The SOLID tables with upholstered benches also offer space for lots of students without specifying an exact arrangement.

A wardrobe area with schoolbag racks ensures that everyone can carry their lunch to their seat without tripping.

"EATING TOGETHER STABILIZES ONE'S OWN SOCIAL NETWORK AND IS VERY IMPORTANT TO THE SOCIAL EMBEDDING OF A PERSON."

(Prof. Thomas Ellrott,
Head of the Institute of Nutritional Psychology at the University of Göttingen)

TEACHER AREAS/ ADMINISTRATION

When it comes to new learning concepts, and especially all-day care, the everyday life of educators has dramatically changed. Those used to working at home in peace, now find themselves having to work at school as well. So the teacher's lounge must be adaptable, to create zones for lots of different needs: Whether set workstations, or workstations in a pool that can be allocated, meeting islands or separate meeting rooms - it should all be possible, from undisturbed work, to conferences.

However, kitchenettes or lounge elements, for example, create cozy retreat areas for turning it all off or having casual conversations - not just for educators, but also for school management and secretary office staff.

TEACHER'S LOUNGE TEACHERS NEED A MOTIVATING ENVIRONMENT TOO.

The furnishings in this spacious teacher's lounge clearly structures it into unique communication, work, and meeting areas, for every occasion.

Upholstered furniture invites one to have small discussions in a relaxed atmosphere. Adjoined partition walls create protected individual workstations so one can work focused, and in peace.

The open workstations on the rectangular tables are ideal for small group meetings and can be pushed together to create a large meeting table for conferences. The kitchen area with a counter and SOLID tables is a meeting point for casual conversations with colleagues.

- 2 In the mailbox cabinet, each teacher has their own personal open and lockable compartments.
- 3 The rectangular work tables can be pushed together to form a large conference table.
- 4 The islands made of COMBi partition walls and MAZE upholstered elements allow for small meetings and concentrated work at the same time.
- 5 The locker makes sure chair backs remain clear and create a tidy overall impression.

TEACHER/TEAM OFFICE FOR SOME CONCENTRATION IN BETWEEN.

Whether preparing or doing follow-up work for teachers, teaching means more than just 45 minutes in the classroom. You will find the right framework here for all of this work. Electrically height-adjustable tables allow for varied working while sitting and standing, which keeps the body and mind awake and focused longer.

The pharmacist's cabinet between the workstations offer plenty of storage space, with added privacy. The comfortable lounge sofa invites you to take small relaxing breaks.

MEETING / TEAM ROOM FOR SOME INSPIRATION NOW AND AGAIN.

You need a breather from time to time if you spend the whole day in a lively environment with children. This small meeting room leaves the everyday school life outside. Comfortable, upholstered furniture in natural colors, create a pleasant atmosphere for team meetings, smaller conferences, presentations or parent-teacher meetings.

You will find an overview of our fabric and material selection at the end of this brochure.

FLEX | PLASTIC SHELL

ERGONOMICAL, PRACTICAL, GOOD.

The longer a school day lasts, the more the concentration tends to suffer. Here is where good seating alone can be used to great effect - it ensures improved attention levels and therefore facilitates learning. With the Flex, we have developed a chair which convinces users through its innovative concept: Pupils can vary their seating positions repeatedly, and thus remain concentrated for longer. In this way, Flex ensures a comfortable and relaxed learning environment in the classroom. Thanks to its intelligent design and durability, Flex is a very worthwhile purchase.

FLEX BRINGS MOVEMENT INTO THE LESSON.

Due to its shape, Flex supports the toning of muscles and relieves strain on the back thanks to the flexibility of the frame. Pupils can vary their seating positions, which prevents fatigue. Integrated ventilation channels ensure comfortable seating even on hot days.

Supports the toning of the muscles through its ergonomic shape and promotes variable, fatigue-free sitting, e.g. saddle sitting

FLEX seat shell with integrated ventilation ducts. The closed surface prevents soiling and thus the formation of mould inside the shell

A2S FLOORSAFE® floor protectors protect the underground, even when tilted, Patent # 10 2010 039 292 A1

KIND TO NERVES, FLOOR AND BUDGET.

You can also rely on Flex even when tipping backwards and forwards: it has been crafted in a particularly robust and stable manner, and is gentle on floors too, even when tipped, thanks to the unique A2S floorsafe® floor protectors.

ADVANTAGES

- **Sturdy design**
- **Easy to carry for every age group**
- **Easy to stack**
- **Easy to put up for cleaning**
- **Easy to clean surface**

*The adjustable footrest allows small and large children to sit together at the same table - learning at eye level **info p. 34-35

The footrest chair is available with either a Pagholtz® or a Flex seat pan. With its two different sizes, it creates the optimum situation for learning across year groups.

FOOTREST CHAIRS

IT IS EASIER TO LEARN AT EYE LEVEL.

Modern pedagogical concepts place new demands on the learning environment - in large part because of increasingly heterogeneous composition of learning groups. Unlike conventional classrooms, children of different age groups are frequently learning together simultaneously. With noticeable differences in students' body sizes, especially in elementary schools and childcare programs, this can present an issue.

The learning concept of teaching at eye level is on the rise. It is important that every student can meet one another at eye level. Previously, height-adjustable furniture was used to compensate for these differences in height. Unfortunately, these differences still exist, even with varying table and chair heights. The A2S footrest chair was developed specifically to allow people of different heights to learn together at eye level, at the same table. By simply adjusting the footrest, everyone from young to old, and even the teachers, can sit together in comfort, at the same table.

Chairs with a small and a big seat pan at a uniform table height of 76 cm (ISO 6)

Up to 3 chairs can be stacked

Our footrest can be conveniently and safely adjusted to the proper height, in just one simple action

7280 Four-legged classroom table with WOODMARK table top, Tidy Box and 2 castors optional

Easy to stack from the front also with book storage or Tidy Box

With piggyback equipment to prevent the table top from sliding down or scratching when tables are stacked

Optional with stable castors for easy movement in flexible teaching

7280 SERIES CLASSROOM TABLES

- due to the unique asymmetrical frame, the tables are stackable and can be placed side by side without joints
- sturdy, yet lightweight round tube steel frame, scratch-resistant powder-coated or chrome-plated
- available in frame size 2-7
- working surfaces with multi-layer melamine resin coating, thus scratch-resistant, shock-proof and glare-free
- as standard we deliver the table with a 3 mm plastic edge in the colour of the top, see A2S material overview
- other possible board designs: Edge beech concealed edge band crowned, ASSODUR®-Multiplex, WOODMARK or 12 mm compact board, colour selection see A2S material overview
- optional with 2 castors on the long side, mobile and therefore flexibly adjustable

7280 Four-legged classroom table with WOODMARK table top
7416.045 Footrest chair FLEX with comfortable one-hand operation of the footrest - learning at eye level

Up to 4 tables stackable

7280.005 Four-legged classroom table 2-seater with WOODMARK table top, chrome frame, with Tidy Boxes

7616.097 Barrel-shaped mono-column table, mobile with lockable valuables drawer

76 SERIES HEIGHT-ADJUSTABLE MONO-COLUMN TABLES

- large adjustment range in height, therefore usable as work and standing table
- triggering of the height adjustment by means of encapsulated Bowden cable and safety hand release, which prevents unintentional release
- heavy-duty, torsion-resistant tubular steel table column
- optional all-steel valuables drawer under the table top
- frame powder-coated in RAL 9006 chrome silver
- optionally available with 12 mm compact board, not with front panel
- possible finish table tops see A2S material overview

3930 Series
folding tables in 2 heights: 72 and 75 cm

Robust mechanics,
easy to fold up

Easily stackable up to 16 tables
thanks to hard rubber buffer

Suitable stacking trolley for safe and
convenient transport of up to 10 tables,
powder-coated RAL 9006 chrome silver

3930 SERIES | FOLDING TABLES

- seating at all four sides
- stable 4-legged folding frame made of round tube (40 x 2 mm), scratch-resistant powder-coated or chrome-plated
- easily stackable up to 16 tables thanks to hard rubber buffer
- equipped with an aluminium design frame (Fig. p. 76), laterally beveled in natural anodised finish
- optional with recessed solid wood frame and rounded corners - conceals the folding mechanism
- plastic floor protectors with level compensation
- working surfaces with multi-layer melamine resin coating, thus scratch-resistant, shock-proof and glare-free
- as standard we deliver the table with a 3 mm plastic edge in the colour of the top,
for finish selection see A2S material overview
- optional with robust ASSODUR®-edge or solid wood edge, concealed edge band crowned and natural lacquered
- glued chipboard from a width of 160 cm with aluminium frame

2010 Hexagonal corner unit combined with two 2001 Rectangular tables

Side and front panels are available in various colours and designs. Ask your A2S area manager.

Office chairs: Info p. 30

Containers: Info p. 98

2000 SERIES DEMOUNTABLE METAL TABLE SYSTEM

- demountable, absolutely robust metal frame, scratch-resistant powder-coated or chrome-plated
- directly coated side panels made of round tube (40 x 2 mm), frames made of square tube (40 x 20 x 2 mm)
- 25 mm thick, directly coated chipboard in a particularly scratch-resistant and shock-proof design
- as standard we deliver the table with a 3 mm plastic edge in the colour of the top, for finish selection see A2S material overview
- different table top sizes and shapes (info p. 86-87)
- rectangular table tops optional with 40 mm corner radius
- optional 10 cm height-adjustable
- many accessories, e.g. CPU holder or cable channels (info p. 95)
- plastic floor protectors with level compensation
- for your individually planned table combination, please contact your A2S area manager
- available in two different table heights: 72 and 75 cm

TABLE COMBINATIONS

Do you manage extensive paper documents which need to be permanently available, do you make a lot of phone calls or have frequent meetings at your workplace? A2S offers the right solution for every work area to you - your A2S area manager will be happy to advise you.

EXAMPLES:

Single workstation as corner combination for smaller rooms

Consisting of
Table 1: 2031/2er 90° extension table
Table 2: 2001s rectangular table

Generous individual workstation with recessed connecting frames for more legroom

Consisting of
Table 1: 2001s rectangular table
Table 2: 2011s pentagonal table
Table 3: 2001s rectangular table

Two workstations opposite each other with corner unit as visitor's seat or additional storage

Consisting of
Table 1: 2030/28s 45° extension table right
Table 2: 2029/27s 45° extension table left
Table 3: 2016.080 rounded corner unit or 2017.080 straight corner plate

You will find further table combinations and tabletop variants on the following pages.

INDIVIDUALLY CONFIGURED TABLES

With variable frames, different table top shapes and extensive accessories, such as table attachments or panels, we can plan your workplace to suit your individual needs. Contact your A2S area manager.

TABLE COMBINATIONS WITH S-SHAPED TABLES

1015.165 Cloud group table
Standing table with shelf

Example combination

1015.165 Cloud group table

The Cloud tables visually soften learning and recreation rooms for a relaxing atmosphere

1015 SERIES | CLOUD GROUP TABLES

- welded, absolutely robust metal frame, scratch-resistant powder-coated
- side parts made of round tube (40 x 2 mm), frames made of square tube (40 x 20 x 2 mm)
- plastic floor protectors with level compensation
- Amoeba-shaped table top allows many combination possibilities due to different outer and inner radii
- 25 mm thick finish board in a particularly scratch-resistant and shock-proof design
- as standard we deliver the table with a 3 mm plastic edge in the colour of the top, for finish selection see A2S material overview
- Standing table with 19 mm thick shelf, shelf height 85 cm, especially scratch and impact resistant design with 2 mm plastic edge in table top colour, for finish selection see A2S material overview

CABLE OUTLET

CABLE CLAMP

CPU HOLDER

INLAY SHEET

MODEL	0904	3035.002	3035.003	1879	520835
Description	Plastic, matt chrome-plated Ø 80 mm	Die-cast zinc matt nickel-plated Ø 90 mm	Plastic, Ø 38-40 mm	incl. additional fixing under the table top, not for sliding top tables, adjustable from 160-255 mm, max. height of CPU: 500 mm, oval and square tube powder-coated	Inlay sheet in CPU holder for retrofitting Mini PC/Tower

Table partition with fabric cover:
Pinboard, privacy and glare protection in one

FLEXIBLE TABLE PARTITION SYSTEM

- 46 cm high partition wall, quickly mountable to the tabletop using allen key and easily retrofitted
- table partition wall system in 2 different versions:
3-layer finish board, 25 mm (E1) with 3 mm plastic edge in board colour or robust softwood sandwich board as pinboard with fabric cover according to A2S colour chart, sound-absorbing
- fastening to round steel tube, Ø 40 x 2 mm, powder-coated or chrome-plated
- suitable for 1000 and 2000 table systems from 60 to 200 cm width
- corner solutions possible
- you will find our selection of fabrics, finishes and steel colours in the A2S material overview

OPTIONS

Chrome-plated frame

Material groups 1-3

Magnetic

Mounting by means of Allen screw on the table top; installation of the partition walls is also possible on triangular and semicircular tables. You will find the A2S table systems from p. 84.

Coherent colour concept: The finish and fabric colours of the partition wall system match the table tops and table panels as well as the chairs' upholstery colours.

Connection of
T-shaped partition walls

The 46 cm high partition walls allow more concentrated work due to less distraction, also available with tables with one-sided or double-sided linking.

A2S CORPUS FURNITURE

CUSTOM-MADE CABINETS

Things always have to be stored well and safely in educational institutions. Ideally, our A2S cabinet system in the EURO grid DIN 18000 can be adapted to any situation, from a single item to a wall unit to a built-in cabinet. This means that a solution can always be found for the most diverse rooms. And you can be sure that you purchase A2S quality from Germany, persistent and resilient.

BASIC CONSTRUCTION

- low-emission, 19 mm thick 3-layer fish board according to DIN EN 14 322 (E1), shock-proof, scratch- and abrasion resistant
- the plastic edges in board colour are 1-2 mm thick (info p. 170)
- all cabinets are firmly doweled and glued ex works; it guarantees high stability and smooth, quick assembly
- all back walls made of 8 mm thick, low-emission 3-layer finish board are grooved and glued all around
- shelves on metal shelf supports with pull-out protection are adjustable by means of row hole drilling
- the opening hinged doors can be opened by the stable, visible all-metal bands up to 240 degrees
- locks with exchangeable cylinder core are optionally available with plate or pin cylinder available
- different base variants enable an optimal adaptation to the room and use. Standard bases are available with independently selectable finish and also up to 3 FH, also roller frames with rubberised castors are possible - thus makes them mobile cabinets

A2S CABINET SYSTEM STANDARD DIMENSIONS

POSSIBILITIES FOR INDIVIDUAL ADAPTATION

- heights and depths of the cabinets can be modified in a grid of 32
- widths can be freely selected individually to make the most of the room
- maximum corpus dimensions of 125 x 250 x 70 cm are possible
- possible base heights for wooden base: 60, 100, 150 cm
- 1-part and 2-part combination cabinets, see pages 106/107

CH = Cabinet height
CorH = Corpus height
CAH = Corpus attachment height
FH = Folder height
1 FH = 38.4 cm

Cabinet depths:
42 cm or 58 cm,
plus front thickness
of 2 cm
e.g. for hinged doors

Cabinet heights: refer
to a 10 cm high base

COMBINATION CABINETS 1-PART

■ 1-part combination cabinets have fixed combinations in 5 FH

COMBINATION CABINETS 1-DOOR	LOCKABLE		COMBINATION CABINETS 2-DOOR SPLIT DOORS	LOCKABLE ON ONE SIDE		LOCKABLE ON BOTH SIDES	
							
FH	5	5	FH	5	5	5	5

			Width 120 cm	4377.850	4378.850	4353.850	4354.850

COMBINATION CABINETS 2-PART

- combinable from two freely selectable cabinet types
- the combination top cabinet (2 FH/3 FH) and top cabinet (2 FH) configure from basic cabinet 2 FH and 3 FH
- the combination top cabinet must have the same width as the base cabinet, two narrow base cabinets and one wide combination top cabinet are not possible

STRUCTURE OF CABINET COMBINATIONS

EXAMPLES COMBINATION CABINETS 2-PART

consisting of base cabinet + combination top cabinet or shelf

COMBINATION CABINETS 2-DOOR	LOCKABLE ON ONE SIDE		LOCKABLE ON BOTH SIDES		WITH SUSPENSION FILE CABINET		
							
FH	5	5	5	5	5	5	5
Height	204 cm	204 cm	204 cm	204 cm	204 cm	204 cm	204 cm
Number of shelves	2+2	2+2	4+2	4+2	2	1	1
Number of extracts					2	3	3
Center panel	lower 2 FH	lower 2 FH	continuously	continuously			
DEPTH	44 CM	60 CM	44 CM	60 CM	44 CM	44 CM	60 CM
Width 80 cm	4215.650	4216.650	4485.650	4486.650	4153.650	4155.650	4156.650
Width 100 cm	4215.950	4216.950	4485.950	4486.950			
Width 120 cm	4215.850	4216.850	4485.850	4486.850			

Due to the additional shelf, the combination top cabinet is always 19 mm lower in order to be able to keep to the folder heights and to avoid height offset in cabinet walls.

Hallway cabinets with top mounted cabinets provide sufficient storage space; the integrated seating niche with benches and table for primary pupils creates a cosy area for short breaks or a quiet workplace for individual or group work

Hallway cabinets in 2 widths and 3 equipment variants establish order; the seating niche with optional button pad backrest offers seating comfort in the hallway without having to adjust the escape routes

HALLWAY FURNITURE SYSTEM WITH SEATING NICHES

- flexible for different rooms and budgets
- in 5 FH and 2 different widths for 1 or 2 students
- top mounted cabinet in 1 FH or 2 FH with plenty of storage space
- carrier board material certified hardly flammable according to DIN 4102 B1
- finish white hardly flammable according to DIN 4102 B1
- cabinet-high handle strips, keep the escape route clear and are easy to grip from any height
- optionally all cabinets lockable
- in 3 different equipment variants
- with coat hook for jackets
- with Tidy Boxes optionally large and small
- small Tidy Boxes also fit under the A2S tables
- pull-out stools with non-slip foot
- base distributor for levelling
- bodies with connecting screws securely interconnected
- seating niche for primary school with 2 seating benches in TAFF B1 or ARTIFICIAL LEATHER B1 and 1 table
- Seating niche high school with a bench in TAFF B1 or ARTIFICIAL LEATHER B1, optionally with button upholstery in ARTIFICIAL LEATHER B1
- finish and material colour selection see A2S Material overview
- seating niches can also be combined with other 5 FH A2S cabinets, e.g. in the classroom or administrative area
- for individual planning also as a corner solution or with inclined roof please also contact your A2S area manager

The DOMINO individual modules in freely selectable colour combinations always create a pleasant atmosphere thanks to the numerous design options - whether for meetings or for small relaxation breaks.

DOMINO SERIES

DOMINO upholstered furniture brings comfort to the schoolday and provides a cosy, relaxed atmosphere. Whether for the arrangement of permanent room furnishing or as movable sitting units, the forms and colours are almost limitless.

OPTIONS.

- visual privacy by means of backrests and/or sides
- linking of modules to form seating formations
- range of colour options

Fits together perfectly and offers numerous design possibilities: DOMINO and MAZE.
For individual planning of your seating arrangements, please contact your A2S area manager.

DOMINO AND MAZE SERIES

- robust construction and durable foams
- easy-care and hard-wearing fabrics and leather covers in a wide selection, in price group 1-4, see A2S material overview
- colour combinations freely selectable within a fabric group
- optional with hardly inflammable fabric and leather covers in B1 of price group 2 and 4, see A2S material overview
- freely combinable individual modules, useable individually or in a fixed combination
- optional privacy and noise protection on back and/or sides, only available in fabric group WOOL
- frame powder-coated in RAL 9006 chrome silver as standard or optionally chrome-plated
- table available with finish board or glass board

Combination of
9387.147 MAZE stool with backrest and
9387.002 MAZE stool supplemented by
elements of the CYLINDRA series

With its versatile combinable elements, MODULA offers countless possibilities for the creative furnishing and zoning of open learning landscapes

MODULA SYSTEM

WORKING AND RELAXING - IN THE SAME PLACE, AT THE SAME TIME.

- sophisticated system for versatile combination possibilities and zoning
- flexibility thanks to the modular principle, can be expanded with straight DOMINO elements
- can be combined with DOMINO, MAZE, CYLINDA, BLOC as well as COMBi for more design possibilities
- robust construction and durable upholstery
- easy to care for and durable covering fabrics and leather coverings in different qualities
- extensive colour selection, freely selectable
- combinations of room dividers and soundproofing function via back panels in three different heights
- back panels optionally with a socket insert or USB charger
- Shelf elements with translucent acrylic glass back panel

No matter whether in learning rooms, quiet areas or waiting areas - the inviting open forms allow for effective dual use of the spaces (e.g. library/media library).

The fabric-covered partition walls also have an acoustic function in addition to dividing the room. In this way, silent focused work and open relaxed communication can take place simultaneously during all forms of learning and working.

MODULA S-shape adjustment combination with
 9 x **9384.045** upholstered element 45° concave

The high backrest elements of the lounge system Comfort Hi serve as a room divider and thus create an island of tranquillity

COMFORT SERIES | COMFORT HI

WORK MORE COMFORTABLY AND RELAX MORE EFFECTIVELY.

Our lounge furniture system Comfort Hi, due to its high backrests, offer a multitude of possibilities to create visual privacy and noise insulated islands of peace in the middle of lively, spacious areas such as hallways, entrance areas or waiting zones. That is, however, not a reason to laze about, since the possibility of media connections can be made use of as free work stations.

Upholstered furniture brings comfort to the schoolday and provides a cosy, relaxed atmosphere

OPTIONS.

- visual privacy by means of backrests and/or sides
- media connections in seating area
- linking of modules to form seating formations
- range of colour options

Electrical sockets integrated into the modular lounge system Domino allow you to work in a relaxed environment

9396.168 COMFORT HI with 9386.001 C-shape table

COMFORT SERIES | COMFORT HI

- flat skid frame optionally chrome-plated or powder-coated in RAL 9006 chrome silver
- robust construction and durable upholstery
- easy-care and hard-wearing fabrics and leather covers in the fabric groups 1-4 in a wide selection, see A2S material overview
- colour combinations freely selectable within a fabric group
- optionally with hardly inflammable covers, B1 in price group 2 and 4, see A2S material overview
- COMFORT HI with high backrests is a room divider and absorbs sound

LOUNGE TABLES

- chrome-plated frame
- table top with multi-layer melamine resin coating, therefore scratch- and impact-resistant and glare-free
- as standard, we supply the table with a 3 mm plastic edge in the colour of the table top, see A2S material overview
- optional edge with 40 mm corner radius

Like a cocoon, the **COCOON** offers a feeling of security and comfortable seating. The half-height back wall seals off the acoustics and makes the COCOON the ideal retreat for relaxed reading, looking at books or simply chilling out.

5012 | COCOON UPHOLSTERED SEATING ELEMENT WITH BACK WALL

- robust construction and durable foams
- easy-care and hard-wearing cover fabrics, standard from fabric group PROTEX or optional choice of WOOL or ARTIFICIAL LEATHER B1 fabric groups, colours see A2S material overview
- plastic floor protectors included
- colours of back and seat separately selectable within one fabric group
- seat height suitable for elementary school
- the semicircular back wall serves as sight and sound protection

CHILL SERIES | BEANBAGS/STOOL/CUSHION

- cover easily removable by zip
- fabrics washable or wipeable
- available in three different fabrics: OX, NORDIC or OUTSIDE, for colour selection and material properties see A2S material overview
- beanbag with handle for easy carrying
- inner bag with safety zip
- filling of polystyrene beads, hardly inflammable, certified according to DIN 4102 B1
- beanbag in combination with stool to put up the feet
- stool and seat cushion not only for CHILL landscapes but also ideal for the seating circle

CHILL SERIES | SEAT CUSHION

- cover easily removable by zip
- fabrics washable or wipeable
- available in three different fabrics: OX, NORDIC or OUTSIDE, for colour selection and material properties see A2S material overview
- foam core
- as upholstery for benches and also ideal for the seating circle on the floor

Whether a combination of a cozy **beanbag** and a soft **stool** to rest your feet on, or a comfortable lounge-landscape of large **reclining cushions** - with our **CHILL** models, small oases of well-being can be created in no time at all for everyday school life.

The particularly hard-wearing and waterproof fabric OX is recommended for primary school, which also matches the colour scheme of the primary school very well.

For a more homely atmosphere and comfortable haptic, we recommend the fabric NORDIC, which can be easily integrated with the fabric groups 1-4 in thought out colour concepts for secondary schools.

Due to their height of 1.42 m, the fabric-covered, mobile acoustic walls allow quiet work, without impairing the view of the room

COMBI SERIES | ACOUSTIC PARTITION WALL

STAYING IN THE ROOM - LEAVING THE BACKGROUND NOISE BEHIND.

The COMBi system is not a fixed room design, but a living, extendible room concept. As lively and flexible as teaching and the school routine, as fast as a spontaneous idea. The combination of a privacy screen and an acoustic element allows the eyes and ears to relax, and the wide range of colours gives any room the desired atmosphere. And the best thing is: if the room design looks different to how you imagined it, it can be changed in a trice at any time.

THE NAME SAYS IT ALL.

The name COMBi is a play on the English terms "honeycomb" and "combination". Therefore, it stands both for the striking shape of the furniture system and for its versatile use.

COMBi can be integrated into a wide variety of rooms and environments. The walls can be connected without tools and are easy to move due to castors. In conjunction with other furniture from the A2S furniture system, it is possible to constantly create new workstations and seating options for every occasion.

COMBI acoustic partition walls:
The right soundscape for healthy learning and working.

COMBI SERIES | ACOUSTIC PARTITION WALL

- acoustically effective honeycomb board as core
- available in the easy-care and hard-wearing fabrics TAFF B1 and WOOL, colour selection see A2S material overview
- optional with electrical set with sockets, also available for retrofitting
- simple and versatile combinable system for all types of work
- flexible zoning and design of rooms and inviting relaxation areas
- levelling feet powder-coated RAL 9006 chrome silver, optionally also available with castors

White sheet steel magnetic for whiteboard pens

Green sheet steel magnetic for chalk

The boards can be used in portrait and landscape format (different rail spacing)

The boards can be removed from the rails: ideal for group work on the site

The A2S aluminium guide with robust plastic end caps is simply mounted on the wall bracket

MULTIFUNCTIONAL BOARD SYSTEM

- the board elements are particularly light and available in the sizes 90 x 60 cm and 120 x 80 cm
- the edging of the board elements is waterproof, the corners are rounded
- the working surfaces of the board elements in sandwich construction can be equipped as required, e.g. magnetic enamelled sheet steel in green or white
- the aluminium guide is robust, the fastening is invisible, the ends of the profile are enclosed by plastic caps
- board system can also be mounted on cabinet walls, info p. 115

The elastic ASSODUR® Edging strip protects the edges from impacts, e.g. when dropping

The lightweight board elements can be easily removed from the board profile rails, but are secured against accidental ejection

Sliding picture clamps with integrated gallery hook can be used in the upper aluminium guide

Bright ultra-short distance beamer for very good readability in all lighting conditions

Highly robust steel enamel surface for everyday school life. The sensor reacts pixel-precisely and without delay

Writing surface with rounded plastic "security corners"

Edges with aluminium profiles processed waterproof

Maintenance-free height adjustment, adjustment range: up to 70 cm

Firm stand due to heavy-duty castors, lockable in 2 positions

Storage strip integrated into the board, which keeps your hands free when needed

All electrical elements are safely stowed away; only the power supply cable is visible from outside

DBmobil
useable in different classrooms

DIGITAL BOARDS | DURABOARD

- system incl. whiteboard (200 x 120 cm) and ultra-short distance beamer
- optional with computer or audio system
- optional with remote control of the board via tablet
- for permanently mounted systems optionally with board wing
- intuitive to use

compatible with all operating systems

DBpylone
with two board wings writeable on both sides, adjustment range up to 140 cm

DBcompact
height adjustable, with integrated storage strip

The document camera (optional) transmits the image directly to the board

Optional with remote control of the board via tablet

The detection of pen movements is purely optical. No electromagnetic radiation, no exposure

BOARD ACCESSORIES
Audio system, response system, tablet and document camera complement the digital board system and expand the possibilities for use and learning.

Ask your A2S field service.

Long wall board Magnetic sheet steel green
Ruling optional, see page 167

Available in 4 different surfaces

Picture clamping strip optional

Writing surface with rounded "safety corners";
profile covers firmly screwed on

LONG WALLBOARDS

- for wall mounting with and without storage strip
- due to the sandwich construction different surfaces are possible
 - enamelled, magnetic steel sheet in green or white
 - 4 mm thick cork coating
 - 6 mm thick cork linoleum coating in 4 different colours, see A2S material overview
- the edges of the writing surfaces are glued waterproof with natural anodised aluminium profiles
- the corners are protected with rounded plastic caps

ATTENTION!
Wall mounting of long wall boards is only possible with solid walls; with lightweight walls only with load distribution frames.

PRODUCTS AND MATERIALS

Every day poses new challenges in terms of functionality and durability of furniture in the educational field. For more than 80 years, we have been working on ideas for high-quality educational furniture which will brighten your day for a long time. We have developed new materials, innovative production methods, and intelligent detailed solutions which have made learning and teaching more comfortable and safer.

And with all due humility - we are quite proud of this. We will present an overview of a part of our selection on the following pages.

A2S FINISH BOARDS

When pupils are letting off steam, the tables at which they sit should be particularly resistant to abrasion, scratches and shocks. That's exactly why we have covered all our tabletops, which are made of chipboard with A2S standard finishes, in several layers with a robust melamine resin coating.

This means that school furniture not only survives the rough everyday school life, it is also easy to clean and largely glare-free.

WOODMARK

Our tabletops are subjected to a lot of wear and tear every day. That's why we provide them with a lot for their journey through life. Special resins ensure break-proof quality of our MDF carrier boards. Under high pressure and heat we press the upper and lower cover layer of hard-wearing, melamine resin-coated finish layer with the board in a metal mould. This makes Woodmark surfaces particularly resistant to abrasion, scratches and impacts.

They are glare-free and easy to clean. Rounded edges reduce the risk of injury.

COMPACT BOARD

The compact board is a highly compressed, black colored wood fibre board. The natural material wood is gently defibered during production and further processed according to ecological aspects. The board has a very high density and is therefore, despite its slim design (thickness 12 mm), extremely robust and the edges are particularly resistant.

MULTIPLEX

Multiplex is, as a material made of cross-glued solid veneers, very dimensionally stable and resilient. For our table tops we coat the robust core made of solid beech multiplex on both sides with 0.8 mm thick HPL laminate, which is abrasion-, scratch- and impact-resistant. In addition it is fire-retardant, food-safe and environmentally friendly, thanks to renewable raw materials. Soft rounded edges make the table tops less susceptible to possible damage and reduce the risk of injury.

PLASTIC EDGE

The plastic edge is robust and shock-proof. As standard, these plastic edges are manufactured in a color matching the surface finish. These edges are ideally suited for table tops in administrative areas.

1 mm square edge
(corpus furniture)

3 mm edge rounded off
(front panels of corpus furniture and table tops)

SOLID WOOD EDGES

A2S solid wood edges are firmly glued to the chipboard, have a high-quality appearance and protect the stressed furniture edges. We offer our concealed edges for the highest demands - in this case the chipboard is additionally coated on both sides with a 0.8 mm thick HPL board. This abrasion-, scratch-resistant and shock-proof HPL coating is fire-retardant, food-safe and, thanks to renewable raw materials, environmentally friendly.

Concealed edge
band crowned

ASSODUR® EDGE

For the ASSODUR® edge, the elastic and liquid polyurethane edge is cast onto the table edge in a metal mould. Due to the strong cross-linking with the board material, it is thus particularly permanently bonded to the chipboard. The ASSODUR® edges are available in three color combinations, all free of PVC and especially abrasion- and impact-resistant.

PAGHOLZ®

PAGHOLZ®

Wherever furniture is subject to particularly heavy use, we rely on PAGHOLZ®, an invention from our company. For PAGHOLZ®, thin veneer layers are prepared at great expense, individually stained and soaked in synthetic resin. Only then we press them under heat with up to 2,000 tons of pressure into the desired shape.

PAGHOLZ® offers the natural appearance of solid wood and much more:

- high form stability
- high scratch and wear resistance
- shock and break resistance
- resistance to staining and abrasion
- light fastness and resistance to chemicals

For you, this means: easy cleaning and flame-resistant, self-extinguishing material that is even weatherproof with special resins on request.

You can be sure of that: We only use native red beech from tree stocks that are carefully reforested. And of course all products made of PAGHOLZ® are particularly durable and can be recycled.

Resistant to
chemicals

Stain- and
abrasion-resistant

Hardly inflammable,
self-extinguishing

Scratch- and
wear-resistant

Shock- and
break-proof
